DESIGN TEMPLATES

You can start off by choosing 1 of the design templates. All designs are customizable for the logos, text and colors but in order to accomplish that we need the following from you:

LOGOS

All logos must be in vector format. Ask the designer who created the logo for the vector file. If you need assistance, we can vectorize your logos but will require a fee.

IMAGES

To avoid pixelation all images need to be submitted at full size with 300 DPI. Images taken from the web tend to be low resolution, which can result in blurry or pixelated prints. To check pixelation, zoom in at 100% which is equivalent to viewing from 3ft. away.

FONTS

Provide the specific font name, or font file in order for us to design using the desired font needed. Please feel free to browse this site to choose your font. [CLICK HERE](#)

COLORS

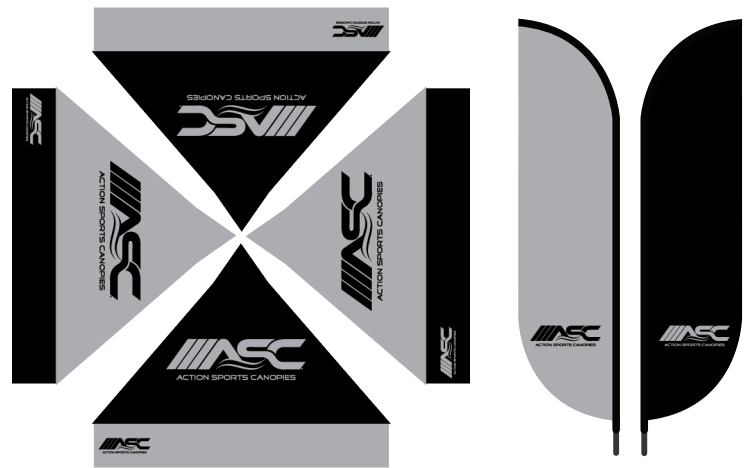

All Pantone Colors must be used from the **Pantone + Solid Coated (C)** book. Any Uncoated (U), Neon/Pastel, Hex (Web) or any other colors will be converted to Coated Colors or to CMYK values. Please be aware, the appearance of color can change based on the material on which it is produced.

PLEASE NOTE: OUR TEAM WILL ALLOW 1 REVISION FOR NO CHARGE, ANY ADDITIONAL WILL REQUIRE A FEE
